Excess Flood Policy Q&A

Q. What is Excess Flood?

A. Excess Flood is designed to provide additional coverage for those existing Allstate Flood (NFIP) customers who need protection against “direct physical loss by or from flood” over and above the current limits provided by the Federal Government’s Standard Flood Limits.

Q. What are the Excess Limits available?

A. Limits are only in excess of the maximum NFIP underlying limits. For Residential Single Family Dwellings, Two-Four Family Dwellings and other residential risks, you can offer up to an additional \$250,000 building and \$100,000 contents (\$60,000 contents for preferred risk properties). For non-residential risks, excess limits are available up to \$250,000 for building and \$100,000 for contents.

Q. Why did Allstate decide to go to an outside company and broker excess flood policies for non-qualifying risks?

A. Our goal in creating this program is to provide our agents with the tools they need to sell to this growing market segment and insulate their book of business from the competition.

Q. Why the McGraw Group?

A. The McGraw Group has a relationship with over 8,000 Allstate agents for personal watercraft and motorcycle insurance, and developed and filed this Excess Flood program for Allstate.

Q. Will the sale of the Excess Flood policy through the McGraw Group count toward Allstate Production contests?

A. No
